# Central Notts District 2023 – Health Form

## Please return this form to your section leader

The health forms that you are supplying for the district camp are for the safety of the young people attending and nothing else.

They are being collected by your section leaders/group so that they have the information should something arise for them.

We are also requesting a copy for the camp leader and first aider, this is purely for the reasons of first aid and accidents and also to ensure that we can cater for any dietary requirements.

We take protection of your personal data seriously and all information will be securely stored and only viewed by authorized people.

At the end of the camp the forms will be handed back to the group leaders to ensure compliance with GDPR.

Where necessary please provide further information on a separate piece of paper and attach to the back of this form. If any information on this form changes, please notify the section leader and complete a new form.

Note: The medical profession takes the view that the parent's consent to medical treatment cannot be delegated. This view is explicit in the Children's Act 1989. Thus, medical consent forms have no legal status and a doctor/nurse insisting on the consent of a parent to a particular treatment has the right to do so. For this reason, we do not recommend that Leaders insist on parents signing the statement above. However, it can be a comfort to medical staff to have general consent in advance from parents or to have a Leader on hand able to sign forms required by the medical authorities.
